PROFILE

Hello, I'm Sena Zeleke, a candidate software engineer passionate about crafting innovative solutions and enhancing user experiences. I'm currently refining my skills at Jimma Institute of Technology.

My expertise spans multiple domains within software engineering. I am specializing in front-end development with react and getting good with back-end. Additionally, I have a good start in data structures, leveraging Python to create efficient and scalable solutions and looking forward to become a software developer. I'm committed to continuous learning and thrive on collaborating to deliver impactful solutions in software engineering.

EXPERIENCE

CBTP, Online birth certificate system
November 2021 – present
Jimma, Ethiopia
It is an efficient online birth certificate system through a user-friendly website. This platform simplifies the process of applying for birth certificates, allowing community members to submit information and track their application status easily.
